im still getting the hang of the wet fly thing i do well with this [pattern](#) and a a similar fly to which i dont have a link to yet but i can tell you how if your interested heres the recipe

hook - nymph 1 xl 12 to 16 i use 14

thread - tan 6/0 or 8/0

body - stripped grizzly hackle quill

thorax - a small bit of hares ear dubbing and a copper bead

hackle - brown partridge i have substituted in the past with phesant flank

this is a very effective pattern for me and i have usually used it in the presence of stocked fish i even fish it behind a wooly bugger
