It's not just limited to the Mennonite groups. I hear the Roman Catholics are using Communion wafers as bait in the FFO sections of Cedar while an order of nuns prays the rosary. What is this world coming to?

On the serious side, I stopped driving up to Cedar about 3 years ago because the fishing was so poor. I used to fish it every year for 3-4 days in May each year. I think it was mostly a problem of low water flows and high water temperatures over the summer. I really like Tom at Slate and loved going to his great shop, but the guys I fished with didn't want to drive 4.5 hours and get skunked for two-three days at a time. Other streams in the area including Young Women's, and Kettle fished better. I hope to return some time this year.
