This is a topic that comes up frequently, so figured some of you guys could probably repost here.

On small streams with wild trout, what are the best patterns? How do you approach the fish? Do you use lighter lines? Anything else that is important to remember on wild trout streams?

I have a good understanding of how to fish wilds but I think this is a good topic for others who may not. I'd add some info but I'm heading out for some wild browns in a little bit 😊
