Slumpbuster,  
In school = lots of time 😊

I agree with JayL about zebra midges when the sun is on the water. Also, buggers and more buggers.

I never used to like winter fishing (age has something to do with that 🙄) but cold weather clothing is so good now. There's an ad in one of the fishing magazines that shows a guy with a big fish and the caption reads "there's no such thing as bad weather, just bad clothing."
