I furl mine outta 3/0 uni thread and they are very supple and they sink real fast. But I also us 2ilb mono too.

The butt is a 5 strand leg and then I step it down 4 times 1 strand per leg. So when you furl the 2 leags together you butt of your finished leader would be 10 strands and your the end you attach your tippet to would be 4 strands. A fiished leader is around 6ft for me.
