I see a bunch of chat re: orvis and cortland lines. Anyone ever use rio? I've used 444SL since the mid-late 80's. Tried an air-flo line once and didn't like it so I stayed w/ the old stand by.

Decided to splurge and buy some new line. Got rio gold and it is super. I won't go back to cortland. Didn't care for the rio grand felt too tip heavy. Rio makes a 'selective trout' line that's DT. I don't know how it would work on a bamboo or if it will touch down on the water like an angel taking a leak. 🤔 Waiting to try the windcutter and sharkskin.
