ATM yes i do. However i hate the new superfine line. It has the built in loop and it breaks apart. Also the line tends to crack after some heavy use.

I do like cortland line.....think ill be buying some in the near future.

Yeah, mine casts really nice with the line.. but i'm expecting that to happen.. My 5 wt. line is orvis line as well, and it has some cracks in it. They are easily repaired with some zap-a-gap. But, when you pay 70 bucks for a line you shouldn't have to fix it after a year. What brand of line does everyone else line? I was thinking about going with some SA line
