I use the "Water Gremlin" ones (with the ears) in size B (very small) and BB (pretty small). I pretty much gave up on micro shot, because they are difficult to put on, and almost impossible to take off. I use "Tungsten Tacky Weight" instead of micro shot.

And NO.....the ears have never made my fly or tippet spin, or hang up on the bottom like some claim. I've been using them for many years.
