Dear vc,

I sitting here waiting to get my septic system fixed so I'm in a foul mood. Besides, I'm genetically predisposed to be cynical. 😊

Like you, I do hope they really mean what they say and I am willing to give them time to accomplish their goal of changing the mode of operation of the F&BC.

A few positive steps per year will be enough for me. I'd like to see them address the demise of the lower Susquehanna River in addition to the trout fishing in the State but that will be no mean feat.

Regards,  
Tim Murphy 😊
