Well, now it is also every PA anglers responsibility to identify instances that our PFBC is not keeping to this policy.

Such as stocking over class A waters. Based on this policy....it should not be done and if it is, "we" need to tell the commissioners about it. If they don't hear from "us" they can't make the necessary changes....they are under staffed don't forget and could definitely us the help.

Time to step it up a notch!!!
