I think this is terrific news about a shift in policy toward the resource over recreation, but I'm skeptical regarding how everyone joining TU is going to be of any assistance. There are a good number of TU members who will not be happy if this shift results in less stocking in certain waters, curtailment of cooperative nursery assistance, or limitations on where the cooperative fish are allowed to be stocked. If joining a local TU Chapter will advance the resource first policy emphasis, by all means do so, but do not ignore the big "if."
