The term "New commissioners" will never go away. Like they said "Resource first" comes from back in the 70's. Then we had "Limit your kill, dont kill your limit". Then we had "Bigger and better". Plus probably some I forget. And now its "Resource first" again. What happens with the next round of commissioners? How does "Back to the buckets" sound? I have to admit, I'm cynical as well after this years popping of the ballon on 1st day, but then no party to follow. When its like this I believe Farmer Dave has a point about just letting people fish in the hatcheries. Tim, I cant imagine anyone arguing your point about the Susky. Every single person I know thats fished it for 10 yrs or so say pretty much the same thing. Something is wrong and the bass are indicating just that.
