DGC.....that's exactly the way i feel about this , we can accomplish this safely and cleanly , we can do it 'cause we are who we are , i feel strongly about what our role , as flyfishers and lovers of fresh clean water , should be , we have this site and the ability to communicate with each other in real time , there are also several tiplines with 800 numbers to call , and remember to follow up to see what happened , i've been keeping an eye on three active sites and so far all looks ok , but if that changes i know what i have to do. Troutbert did a great thing by posting that TU link we should all do that at least.
