I like the orvis fly tying guide.

It's broken into sections such as dry, wet, streamer, nymph, etc. It will show you how to tie a basic version of each... such as the Adams for a dry, or the hare's ear for a nymph.

The idea is that the basic patterns will teach you the necessary skills, and it will eventually reduce to mixing and matching techniques/materials/colors. It finishes with recipes for the entire orvis fly catalog, which is handy.
