I always get it tangled up when I fish it off the eye...but I can't say I remember catching any fish on the first fly with the second tied off the bend of the hook...maybe 1. I am not sure

I used to feel the same way about catching fish off the first fly I think it's a confidence thing. At first you'll notice one on the front hook every once in a while. It will become more common as time goes on.

Trying lengthening or shortening the tippet to the second fly. Or even adjusting the tippet to the first fly.

Little tweaks like these have really improved my hook up rate.
