I fished a double nymph setup yesterday. My setup was fly line to around 9 feet of 5x tippet, indicator, single split shot, beadhead nymph (size 14 and 16) then size 18-20 zebra midges or small glow bugs off the eye of the nymph. I ended up catching 9 fish on this setup and only got seriously tangled and had to retie once maybe twice. I caught fish on both the top and bottom fly with them bottom taking 6 fish and the top fly taking 3 fish.
