Look at Afish Czech knots and line from his attachment. Taper each section down in size. Put a wulff or Humpy at the top as an indicator, Try a smaller nymph like a pheasant tail or zebra midge size 18-20 then at the bottom use a weighted or beaded prince.

Think top fly indicator..maybe fish

2nd fly teaser chasing ..attention grabber

Bottom fly bouncing across the bottom.

I catch most of my fish on the middle fly.

You'll need each section to be at least from your chin to the end of your arm before tying them on. When all is done the flies are between 16-18 inches apart. Closer results in a rats nest beyond all imagination.
