The has passed, now moving to Senate.

One thing here that I am not exactly sure how accurate this is right now. This news site is saying " The bills states that DCNR will get the sole right to determine which state land is leased when the moratorium ends."

[House bill passes](#)

The PGC has had two drilling experiences so far and both were negative. As one commissioner has said, we are 0-2 with the drilling on the game lands.

Do you have more info on these Game Lands drilling sites? The locations and problems?
