Permanone, permanone, permanone. You can find it with the other bug sprays at wally world. Just spray your cheap long sleeve tee, waders and anything else you may wear that touches brush and let dry. Lasts weeks even through a wash or 2. I'm sure it causes cancer every pesticide that works well does but you bite your split shot so you won't mind.

LittleLehigh,

Interesting suggestion to treat waders, I hadn't thought of that. Have you noticed any premature wear and tear from using Permanone to treat your waders?
