Im a morning fisherman so nymphing is usually what you have to do to catch fish in the wee early morning. I enjoy catching fish with both. But I find it futile to prospect with dries, unless its terrestrials. If fish are on top, then thats where Im gonna be. Most times though, atleast when Im out, nymphs are on the menu.

Fishing should be fun, so Gfen, if you find nymphing boring, Id say dont do it. But Id say atelast know how to do it right, cause it might save you from the skunk
