"takes a man to fish bamboo and silk" ??? If you say so. My personal pref is for a rod that is med-fast to fast depending on what I'm doing so you'll probably never see me browsing the rack of bamboo rods at the local shop. It is definately an art to build them but I never understood why you'd want to fish with one. I'd put one in a shadow box on the wall but probably never fish it. I'll take modern equip and sit on the bank for hours. I don't even have to fish. Just decompress and enjoy the beauty of nature. I do smell the roses.
