Hello all,

My name is Mark and I own and operate a web site that is dedicated to helping you catch more fish. Or if you don't need help - we provide an outlet for you to share your knowledge with your fellow anglers.

Our site contains detailed information on rigs used to catch fish all over the country. We capture data such as rod, reel, leader, fly, and tactics used including pictures of fish and rigs. Our search engine allows you to search by state, body of water, or fish species.

We've only been running since 10/1 and already have 26 submissions from Pennsylvania. These submissions have been from the following waters: Laurel Lake, Littel Pine Creek, Mountain Creek, Pine Creek, Slate Run, Spring Creek, and the Yellow Breechs and have been for the following fish species: Brown Trout, Rainbow Trout, White Sucker, Smallmouth Bass, Brook Trout, and Bluegill.

Hopefully the web masters here do not mind this post.

Check us out if you have time. We don't have a message forum so if you could provide any feedback - it would be greatly appreciated.

Happy fishing-
Mark
