Where did the Salmon enter this? There are no Salmon stocked in the Lehigh. But there are lots of trout stocked there and if the flow of water and temps would be cooler in the summer many more fish would survive and spawn in the tribs as you mentioned. Would it be "World Class"? That's a matter of opinion, but it sure would be a great fishery close to many people.

Salmon entered it when someone made a joke. As is their right.

And no, it almost certainly wouldn't be world class by most peoples' standards. I'd love to see a better fishery there, but world class it ain't. I'm not going to pin that on the corps.
