Looking for a nice reel

Hello.o

So I'm looking to to get a new reel, some thing nice to balance out my rod. Ive tried the Prestige reel from Cabelas but the paint chips off way to easily and the drag loosens up really easily as well.

Right now I'm looking at this [reel](#) but I know nothing about the brand or the reel. It looks awesome but I don't know where i can get my hands on this reel to see if it balances out my rod. Any one own this reel?

Id say my price range is \$150.00 and the reel is for a 5 weight rod. I'm looking for it to be a large arbor as well and light weight because my rod is pretty light. I don't want to over look the drag either, that's just as important as any other parts of the reel.

Thank you for any suggestions.

~Jon
