Hmm..

1. Syle- Large arbor, I like how it looks and the line doesn't coil as bad.
2. Weight- Must have a balanced rod. I seem to have more fun if its balanced right.
3. Drag- Gotta have a dependable drag. I have a Lamson Velocity and its drag is so nice. I think it set the bar so high for my standards of drag even though I rarely use it(9weight). I would never buy a reel that expensive.
4. Durability- Meaning the paint doesn't chip off, ha.
5. Line capacity- I don't really recall to many of the big fish Ive caught even reaching the backing.

Hope that helps.
