Hi Jon - The Cabela's 5wt Prestige reel weighs 5.3 oz, and the Allen reel you linked to is 5.4 oz. Pretty close. Allen's products have received nothing but glowing reviews, so that might be a good choice, at a fair price.

You might want to check out the Lamson Konic 2.0 while you're at Cabela's. Same drag as your Lamson, and the finish is very durable. I have friends that have Konics, and they all love those reels.
