+1 on the Lamsons- I have 2 Velocities, and love them. I would also consider buying a Teton Tioga, if you can find one on eBay. The original company went belly up a couple of years ago. They have started back up, and you can find their new Teton reel (similar design as the old) at Cabela's. Not sure if they are as good as their older reels. <http://www.tetonusa.com/>
