Overcast skies, clear / cool flows around 50 degrees and 400 cfs. We put our 7 man float in and began fishing around 9:45am and had sulphurs on the water right away. Hatches of sulphurs, olives and a few ISO's continued until 3:30-ish when the sun came out and shut everything down. Between 3:30 and 8:30, virtually no bugs or rising fish. Action was quite hot between 11 and 2. Fish were taken using nymphs, wets, dries and emergers.
