We fished Buck Run in the Laurels Preserve once last year. Caught a bunch of fish - smallmouth, rock bass, fallfish, bluegills, chubs, shiners and things I can't identify. Plenty of action.....no trout. By the way, it's a mile walk to where we fished. Absolutely beautiful stream. I've been told there are trout downstream from where we were. I also believe there are wild trout between the stocked section and the Laurels. Actually, I believe there are wild browns spread out throughout the creek. Much of it is posted but there are areas to access as we checked out the entire length early this Spring. I'm going back this year. Just been busy fishing other streams.
