PSU,

I think Beaver Creek used to have a substantial wild trout population. I can remember about 10-15 years ago walking along the stream and little fish that looked to be about 5 inches or so jetting around in the holes. They behaved like wild trout and then there were the stockers. I cannot recall ever catching any wild trout in that stream though. They might still be there but I don't think that they are there in significant numbers. Its chub central in that place.
