I've got an entire collection of Medalists now, from the early 1950s to a new production 1595 that I use for just about everything now.

I bought it to replace an Abel that went in for factory service, I have no interest in returning the Abel to major use.. Costs too much, and there's something oddly pleasing about bashing a \$25 Pflueger off every rock in the stream and knowing its not getting ruined, but gaining personality.
