so tell us, where do you regularly catch 20" trout!!?? your streams have much bigger fish than my streams!

Not many, but I did have some wild rainbows in the Sierras make my reel work in some heavy turbulence Wed-Fri last week and was glad to have it there. When those suckers get rolling in the river coming down from the melting snow cap, they can really put on a show!

And yes, Jaybo, I'm still sick over that trout, mate!
