Mine is an old harbocks Ibbotson co bamboo fly rod. It has two tip sections and the one is broken at the ferrel and the tip is missing. the other one is fine. I realize this is not an expensive rod but I would like to recondition it so I could fish with it. This rod was given to me by my uncle when I was a kid and I did use it some then. I have only had it out of the case a couple of times in the last 60 years.
