Cabela's had unnamed fly rods in the Bargain Cave a few weeks ago with a sticker on them that read 905-2, which I assumed meant 9 ft, 5 weight, 2 piece. Very nice cosmetics, brown woven graphite reel seat. They were test rods given to Cabela's to get their fly fishing employee's opinion without knowing who the manufacturer was. Still had the plastic wrap on the grip. So I offered them \$60 (they were labeled \$75), which they accepted, and I took one home to test. I Liked it so much I went back the next day and bought one for my son.
