Most of my gear is cheap and much of it old.

I suppose in answer to this thread I'd cite my Downs chest fly box. I bought it in 1983 (can't remember what I paid for it but it wasn't expensive). I've since customized it extensively but it still goes with me whenever I'm trout fishing (except brookie hiking) and stays in my car all year round. Its needed some minor repairs but has proven very tough and reliable.
