I love this [Web Wing](#) stuff. I also use turkey and other quills with a coat of flexi-ment (sp) on them. The key is to cut them on the rubber surface your cutter should have come with.

I remember seeing Web Wing in a shop one time and thinking it would work great for caddis wings. Just ordered some to give it a try thanks Tom.

Lou, Plumbob, I'll see you guys at the meeting next week.
