You were studying or working or don't want to fish that sewer, or so I thought. That brown we saw was a serious tank. We hammered him w/ everything but he showed no interest. Tried to sneak up and take an under water pic but he would have none of it. When I got too close, he shot out of there like an 8" fish would have. If we would have hooked him, it would have been short lived. He had some serious wheels. His tail had to be 6-7" from top to bottom!

flyflingers good eyes spotted him. I would have guessed it was a carp but then again, I'm blind.
