Buck,  
Saw the same bug on Tues. @ the Pirates/Mets game. landed on the seat in front of me. Same description, but with an orange egg sac. reminded me of a sulper, but at this time of year and on the three rivers?

We used to get huge mayfly accumulations on the sides of the buildings when I worked on the north side of Pittsburgh. Those rivers actually throw off a ton of bugs.

Tom,  
It was a mayfly, I've seen crane flies before and it wasn't one.

Ok, Buck never said it was a mayfly so I thought I'd ask...
