If sunrise is at 5, we can hit it at 4. Near dark conditions is about the only way that big one is going to be caught right now. I can't say if jdaddy was night fishing in the open regs water or what. I wasn't there. That was the biggest trout I've seen in that river and I've fished it since 89-90. To lurkers: He's sitting behind a fallen log, right in the ?????????? section. Good luck finding him.

ff,

Nice meeting you too. Saturday was a little slower than usual. When we get some cooler temps and a little more release of water, we'll do it again.
