I was talking to sandfly over the weekend about delaware bass. He says the Hellgie population is bigger than the carwfish pop. any stream feeding the delaware will be the same. He swears by his hellgie pattern (skilton) on the rivers there. Also he ties a fun fur minnow thats killer for the area. He does something with goop to make it swim like a real fish. I know he will not be around for a few days as he's trolling the local lakes in his pontoon with some new patterns.
