As a newbie to this whole fly fishing thing I have come to think nymphing as the same as my old reliable bait/spin fishing. It is the same, so I try to stay away from it. I started fly fishing because I wanted something different. I want to watch my fly go under a tree branch and get gobbled up. The excitement of surprise is just fantastic. If I wanted to fish with a bobber, I would put on a butter worm lol Just my opinion.
