One time, when trout fishing with my unenlightened buddy (he's a bait fishermen) who ran out of bait (worms & minnows I think). I was catching fish left and right on nymphs. I called him over and tied on a weighted nymph to his line and told him to add a medium sized split shot 8 or so inches above the fly to have enough weight to cast it on a spinning outfit. I told him to fish it like bait, but set the hook as soon as the fish hits. He caught a whole bunch of fish using my fly....

BTW, from that day on, he always carries a few flies in his vest just in case his worms die or his minnows go belly up...lol
