Excellent topic, I really like this.

afish, super helpful post, but I'm having a hard time reading the picture you posted. I'd love to maybe try and post a higher resolution copy. You can email (PM me for the address) the PP (I'm assuming PowerPoint) file and I'll see what I can do.

I've been having a really hard time with store bought mono-tapered 'knotless' leaders and memory, will this pretty much clear up that problem? Also, can you just roll them up and store them in a leader wallet without any problems, ie. that dreaded memory?
