albud1962.....where in the Mechanicsburg area was there a fishkill? I'm not rying to be a smartass , it's just that after moving back out west here i don't get the news on stuff like that and i'm really concerned and interested in what happens in all of our states waters and woods , was the problem in the Susky? or was it a smaller water like the Conodoguinnet or Breeches? I'd appreciate any info , thanks.
