For rivers (Schuylkill, Perkiomen) I use a Orvis T-3 8 wt tip flex with sci anglers bas bug tapper on a orvis mid arbor reel I also keep a extra spool with Orvis streamer /striper sink tip line. Leader I use Clouser's formula .I use this for all big water lakes and ponds

For big streams (Brandywine) I use a orvis T-3 6 wt tip flex with a orvis large arbor reel with orvis wonderline wf trout and a extra spool of Orvis streamer striper sink tip line Leader is the same Clouser's formula

Small streams I use a Orvis 7'9 5wt troutbum full flex rod with a Orvis battenkill barstock reel with orvis wonderline wf trout . leader would be 9ft 3 x

Like Lefty says to catch big fish you got to give them the breakfast so the smallest thing I chuck is a size 6 with the average being a size 4 and anything over 2 and a half feet of water I whip out the sink tip..... 😁
