The Drillers wish to draw 750,000 gallons of water a day from the Susky River across the road from Hyner Run State Park entrance Road and beside the Gold Star Mothers bridge. I wrote in objection to the variance in which the drillers (Anadarko) wanted from Chapman Township. Route 120 is the main travel route in the area and homes are close by. I just read in The Record, the local paper, that the judge over turned the ruling. In the another article, a tanker hauling water on Hyner Run Road hit a bridge and got hung up on the structure, needing other heavy equipment to free the vehicle. Don't worry, your tax dollars will repair the bridge. The roads in the North Central part of the state can not handle the thousand truck loads of water needed for each well or eight thousand loads per well pad and your tax dollars will fix the roads as well. The driller (Anadarko), has to meet twelve conditions to use the facility including putting up a six foot tall fence, permitting only seven tankers at a time at the facility and a traffic signal if PennDot decides safety is an issue. Anadarko was part of the Gulf disaster also so what could possibly go wrong? Tongue in cheek of course.
