Wasn't there an article on this (but in another state) in Trout magazine. Might have been another mag. But they showed a sequence of photos showing how the drilling spread like a rash.

Here's a tip though..if you want me to be on your side...don't make me go find your argument myself. Astonish me with some piece of info...don't just throw the link down in front of me and expect me to read it. I might, but in this case, I was busy that day. If you had grabbed my attention I might have made a better effort to read it.

Mostly because, A-I didn't know they weren't drilling there now.

B-oh hell its late i'm tired..c'mon Jack,

sell me..tell me why I should be pissed. 😡
