I think it all depends on the lake. Some places I go I can see the bass spook before they even get in casting range (And I am good at stalking fish I can catch fish on valley with ease) . There isn't alot many lakes and ponds to fish in my area so I don't have alot of time in with the fly rod. But my expierence has taught me yellow poppers and clousers of any color. Black conehead wooly buggers . I haven't caught any pike yet and I don't know anywhere close that has any some i'm kinda a** out until I do 😞
