Other than the novelty of something different or tradition whats the advantage of a spey rod?

I think you answered your own question.

Although, I have seen spey rods cast only twice and there were some impressively long casts.

I also was curious about the distances...check out this site..

(its British but..) it appears the difference in casting distance between an 8 or 9wt and a two handed rod is about 60 to 70 feet. I guess thats why?
