Re: "if we never start it will never happen."

It started a long time ago. TU was formed in 1959 and has been working on this stuff ever since. And there were people working on these things even long before TU was formed.

So, join in. We can always use more help. But be careful not to say things like "if we never start it will never happen."

That dismisses the efforts of those who have been working on these things for most of their lives.
